Re: Sanitary Survey Letter, Milton Water Department Water System, Public Community Water System, Milton, VT, WSID VT0005079

Mr. Elwood,

A sanitary survey of the Milton Water Department Water System (Water System) was conducted on January 13, 2023. I represented the Vermont Department of Environmental Conservation, Drinking Water and Groundwater Protection Division (Division); you, as the Water System's Designated Operator, and Steve Edgerly, represented the Water System. The Water System is fully consecutive to the Champlain Water District Water System (Wholesaler, WSID 5092). The Water System was issued a Permit to Operate (PTO) on April 9, 2015. The PTO does not have an expiration date, although the PTO will be amended by the Division as deemed necessary over time.

During the sanitary survey and file review, no deficiencies were identified. The Division appreciates the Water Systems attention to detail and dedication to provide safe drinking water to its customers.

I appreciate you and Steve meeting with me in order to conduct the sanitary survey of the Milton Water Department Water System. I look forward to working with all of you in the future. If you have any questions or would like to discuss anything regarding the survey, please feel free to contact me at the address above, by email at andrew.ferguson@vermont.gov, or by phone at 802-585-8089.

Sincerely,

Andrew Ferguson
Community System Operations Specialist
